 Last Updated on STN: 27 Aug 2003
 PARN This Application claims benefit to a provisional application No.
 60/269,785, filed on Feb. 16, 2001.
 CLMN 44
 GI 6 Figure(s).
 FIG. 1 illustrates three binding sites of an amine-glycyrrhizin ionic
 complex. The degree of substitution for the ammonium salts is arbitrary
 for this illustration.
 FIG. 2 is a graphical representation of the aqueous solubility of the
 famotidine/glycyrrhizin complex of the present invention.
 FIG. 3 is a graphical representation of the aqueous solubility of the
 buspirone/glycyrrhizin complex of the present invention.
 FIG. 4 is a graphical representation of the aqueous solubility of the
 loratadine/glycyrrhizin complex of the present invention.
 FIG. 5 is a graphical representation of pH on the famotidine/ glycyrrhizin
 complex of present invention.
 FIG. 6 depicts a method of preparing one dosage form, (a drug/
 glycyrrhizin complex powder) of the present invention.

children (mean age 3.8 yr), and a randomized, double blind, placebo controlled, parallel group study for tolerability of **loratadine** in multiple doses (n=60, mean age 3.67 yr) vs placebo (n=61, mean age 3.52 yr). The peak plasma concentrations of **loratadine** and its metabolite **desloratadine** were 7.78 and 5.09 ng/ml, respectively, observed 1.17 and 2.33 h after administration of **loratadine**; the plasma AUCs were 16.7 and 87.2 ngh/ml, respectively. Single and multiple doses were well tolerated, with no adverse events occurring with greater frequency after multiple doses of **loratadine** than after placebo. Electrocardiographic parameters were not altered by **loratadine** compared with placebo.

response between the loratadine and placebo groups (p = 0.99). All signs examined had decreased by the end of the study. The result demonstrated that 0.1 per cent mometasone therapy is very effective for treating childhood atopic dermatitis. Loratadine did not show beneficial effect when combined with good topical corticosteroid but it was safe and had no serious side effect on the children.

FILE USPATOLD

FILE COVERS U.S. PATENTS 1790-1975
Produced using data provided by Univentio.

This database was created using Optical Character Recognition (OCR) technology. For this reason, some characters may be missing or mistranslated. In order to improve searchability and retrieval, CA indexing information has been added to the Title, Inventor, and Patent Assignee fields where possible. Please see HELP CASDATA for more information on the availability of CAS indexing in this database.
